

Flood Sensor

Price: 5-25 EUR

Where to buy: In every electronic store; on the Internet.

Description: Flood Sensors are able to warn tenants in case of a flooding in bath or kitchen. Flood Sensors are battery powered and can easily be installed on the wall or ground.

Case description: Mr. Smith returns to his house after an exhausting gardening in the backyard. Now he wants to relax a little bit. He takes a bath and goes back to the living room and lays on the couch. After a while he falls asleep. He wakes up from a loud warning signal. Fortunately the flood Sensor warned him just in time, so that he can go to the bathroom and turn off the faucet and avoid a water damage.
