

## E-reader

**Price:** 80 – 100 EUR, books need to be bought separately.

**Where to buy:** In every electronic store; book store; on the Internet.

**Description:** An e-reader is a portable electronic device for reading digital books and periodicals better known as e-books. The e-book reader is designed to operate over long hours by consuming minimal power. It can be used over weeks before it needs to be recharged. Books are bought via online stores and need to be transferred to the device. This is done via the internet or a personal computer. The e-reader is very light weight (around 200 gram). Electronic books are not necessarily cheaper than paper versions.

**Case description:** Mr. Walker's hobby is reading books. Since he bought an e-Reader, he does not have to take several books with him on holiday and just stores them on a single device. In addition, he can buy new books on the internet.
