

Medication dispenser

Price: starting at around 70 EUR

Where to buy: On the Internet.

Description: The Medical Dispenser automatically reminds people to take their medication. It ensures that people do not take more medication than needed. Once it has been set up to the correct time and filled with drugs, it rings an alarm to remind taking medication. Some devices can send an alarm to a caregiver. The compact size ensures that it can be easily transported.

Case description: Mrs. Miller has to take several pills in the morning and in the afternoon. It is very complicated for her to manage the process because the pills look all the same and sometimes she has the feeling that she becomes more and more forgetful. Her daughter is living next to her and she bought a medication dispenser. She prepares it at the beginning of the week and it reminds Mrs. Miller every morning and afternoon.
